

Workshop 13

Text Summarization

Preparing the Environment

1. `pip install sumy`
2. `pip install transformers torch`

Task 1

- Run `extractive_sum.py`
 - Based on TextRank
- Which sentences were chosen?
- How do you feel about the output summary?

Task 2

- Run `abstractive_sum.py`
 - Based on BART
- How is the result when compared with extractive summarization?
 - Which one is clearer?
 - Which one is safer?
 - Which one would you trust?

Task 3

- Generate **extractive** and **abstractive summarizations** on the given samples files.
- Record the generated summaries and give each of the summary the score (1-5) on the following criteria.
 - Fluency
 - Coverage
 - Faithfulness
- Compare the results obtained from both techniques.
